Kawasaki Motors USA Recalls Lawn Mower Engines Due to Burn ...

If you buy a new 19 hp vertical engine and run in very dusty condition, it will fail about 400 hours . The reason is the crankcase breather plate in made of steel and the block is aluminum,the plate will not expand as fast as the block, causing the four 6 m m bolt to loosen. When this happens it will leak small amounts of oil to be discharged into the cooling fins, which collects dirt and causes major failure of the enigne (head gasket,valve overheating,more oil leaks from seals).

Loosen fuel cap and try to start, if it starts and runs the fuel cap vent is plugged. Faulty fuel pump, check this by removing plug wires (to prevent accidental start), then remove fuel line on carburetor and direct into clean container, turn over engine and see if fuel flows from line, if fuel flows fuel pump OK.
