There is also a smaller ground wire for the body that connects either to the ground post on the battery or the engine block. (the engine block should already be grounded to the negative post on the battery with a fairly large cable.) If you're talking about any other ground wire you'll have to be more specific. Good luck.

Ground points / ground wires in the bay depend on what Engine management you have and if your car is CEI, CE2, Westy. Generally speaking, there are 2 bundles on the fender wall near the battery (need to take battery out to get them), a group which grounds to the back of the battery tray, a group which go to the head and/or intake manifold.
