4m40 Engine Timing Marks

102 Answers. Re: Timing mark of re assembling 4m40 engine. Not sure which timing marks you are after. For the camshaft - there is a mark on the camshaft pulley, and a mark on the crankshaft pulley, on the timing chain, there are two colored links, position the two links on the two pulley marks, with #1 cylinder at TDC and the small square lug in the centerish of the cam shaft pointing upward.

HOW TO FIX CARS & TRUCKS : 4M40 TIMING MARKS

Rule No1 in engine timing. Turn engine by hand 10 times before starting. The notch on the crank pulley must not be at 0 degrees. Ideally you will need to remove the timing gear case to check the marks as posted in the image and PDF files I posted. I would look for better signal and download the files I posted. Work through it.

2.8 TDI Timing

Ignition timing is when the distributor sends an electric spark into the engine to ignite the fuel. This fuel ignition is what powers the car. The sequence in which this happens is very finely balanced, or "tuned," to provide maximum power and economy. When the timing is not set properly the car may experience ...
