Best Practices - AIA

By Tim Cowan, AIA. The American Institute of Architects' (AIA) Academy of Architecture for Health has issued the 2001 edition of The Guidelines for Design and Construction of Hospital and Healthcare Facilities. This publication will have a significant impact on healthcare building design and construction and, in turn, on infection control policies and practices in hospitals and healthcare facilities throughout the nation.

The New AIA Guidelines: | Infection Control Today

Architects are typically the responsible design professionals, with a corresponding duty to protect the health, safety, and welfare of both building occupants and the public. The AIA represents the profession on these important issues by supporting member architects' participation in the code development and adoption processes.

AIA Introduction to Codes and Standards

AIA's Architecture Billings Index (ABI) score of 29.5 for April reflects a decrease in design services provided by U.S. architecture firms (any number below 50 indicates a decrease in billings). During April, both the new project inquiries and design contracts scores also declined significantly, posting scores of 28.4 and 27.6 respectively.

The AIA Standards for Continuing Education Programs replaces the prior AIA CES Provider Manual. The new standards are in effect as of January 1, 2019, but we will be working with AIA CES Providers to come into compliance throughout 2019. Any courses approved prior to January 1, 2019, will still fall under the prior AIA CES guidelines and ...

The American Institute of Architects (AIA) published the first edition of CAD Layer Guidelines in 1990. The early success of the first edition and rapidly evolving technology resulted in the second edition being published in 1997. The most significant change between the first and second editions was the elimination of the "short" layer name
