### Annuals And Perennials

Annuals: Plants that flower and die in one season are annuals—although some drop seeds that grow new plants in the spring. Annuals typically bloom all season until frost, so you get consistent color and showy blooms. These plants can go in the ground any time, even in midsummer, to refresh your beds. Perennials: Perennials, on the other hand, come back for many seasons.

### What Is the Difference Between Annuals & Perennials ...

Annual flowers, or annuals, have a lifespan of one year, rather than occurring yearly as the name might suggest. On the other hand, perennial flowers, or perennials, grow back every spring. Both of these words stem from the Latin root for "year."

### Perennial vs. Annual Flowers: What is the Difference ...

Annual plants are thus those that last for a portion of but a single year (even in their native climates). Perennial plants have something extra: that "per" in their name. The per-prefix in Latin adds to what comes after it. So perennials, given the proper conditions, will live extra years, when compared to annual plants.

### The Difference Between Annuals and Perennials

Annuals complete that cycle in one growing season, whereas perennials live on for three years or longer. But, if you begin studying the labels on your new plant or seed packet purchases, you'll discover many twists on this basic definition. You'll come across terms such as "hardy" and "half-hardy" annual, or tender perennial.

### Annual vs Perennial - What is the Difference? | Garden Design

Perennials, on the other hand, live for three or more growing seasons. They are less work than annuals because they grow back each year from roots that go dormant in the winter. They will be around from year to year, so they put their energy into growing strong roots instead of growing lots of flowers like annuals do.

### A Guide to Annuals Versus Perennials | HGTV

Annuals produce more flowers and bloom for a longer period of time than perennials. Annuals bloom from spring till the first frost. Perennials generally bloom for a single season: summer, spring or fall. There are ever-blooming perennials that bloom longer, but annuals produce the most flowers for the longest amount of time.
