### **NEW ZEALAND DATA SHEET - Medsafe**

Apomorphine is associated with local subcutaneous effects. These can sometimes be reduced by the rotation of injection sites or possibly by the use of ultrasound (if available) to areas of nodularity and induration. APO-go Pen 10mg/ml Solution for Injection contains sodium bisulphite which may rarely cause severe allergic reactions and bronchospasm.

### **Summary of Product Characteristics - Clonmel Healthcare**

Second, you must be able to convert a percent solution to mg/ml. A 2.5% solution is 25 mg/ml. This is hard for some students to remember. A memory tip is that a 100% solution would be 1 gram/ml. Therefore a 50% solution would be 500mg/ml, and a 5% solution would be 50 mg/ml. The math to solve this question is:
