Red teaming is typically carried out without a company's blue team knowing in advance that it is being conducted. If, during an engagement, a target company detects a red team's malicious activity,....

Penetration Testing Versus Red Teaming: Clearing the Confusion

Red Team engagements use a tailored set of TTPs and goals over a prolonged period of time. Red Teams don't just test for vulnerabilities, but do so using the TTPs of their likely threat actors, and in campaigns that run continuously for an extended period of time. There is debate on this point within the community.
