Linux is a sort-of-descendent of Unix.

File Type PDF

Basic User Guide

Linux

The core part of Linux is designed to behave similarly to a Unix system, such that most of the old shells and other text-based programs run on it quite happily. In theory you could even hook up one of those old 1970s terminals to a modern Linux box, and access the shell through that.

Linux

Command Line

Synopsis: users [FILE]

With no FILE argument, `users' extracts its information from a system-maintained file (often `/var/run/utmp' or `/etc/utmp'). If a file argument is given, `users' uses that file instead. A common choice is `/var/log/wtmp'. An exit status of zero indicates success, and a nonzero value.
