Glad I went with the BFG motherboard. Cons: Online data here indicated it could handle the 4 gigs of RAM I bought to put in it. The manual that comes with board indicated it could only handle 2 gigs, which concerned me a bit. I went ahead and pushed forward with the 4 gigs and it worked great. Overall Review: The optical out works well. I ...

home rig as well. I upgraded it last year I think. I didn't know at the time but that motherboard didn't support my new processor. I called BFG using a number in the manual. Their customer service was awesome. They told me what address to go to and I downloaded the BIOS and was running great from there.
