Burn Management in the Emergency Department. Burn injuries are, unfortunately, a common reason for visits to the pediatric Emergency Department (ED). St. Louis Children's Hospital is a local pediatric burn referral center, and children are often sent to our Emergency Department for initial evaluation and management of burns or chemical exposures.

Burn Management in the Emergency Department - ChildrensMD
Excise adherent necrotic (dead) tissue initially and debride all necrotic tissue over the first several days. • After debridement, gently cleanse the burn with 0.25% (2.5 g/litre) chlorhexidine solution, 0.1% (1 g/litre) cetrimide solution, or another mild water-based antiseptic. • Do not use alcohol-based solutions.

Management of Burns - WHO | World Health Organization
Superficial partial-thickness burns involve all of the epidermis and the superficial dermis. They are red, moist, and very painful. There is blister formation, and the burns usually heal with minimal scarring in 10 to 14 days. Deep partial-thickness burns involve all of the epidermis and most of the dermis.

Burns Management
A burn is a type of injury to skin, or other tissues, caused by heat, cold, electricity, chemicals, friction, or radiation (like sunburn). Most burns are due to heat from hot liquids (called scalding), solids, or fire. While rates are similar for males and females the underlying causes often differ. Among women in some areas, risk is related to use of open cooking fires or unsafe cook stoves.

Burn - Wikipedia
Cool affected area as soon as possible (within 3 hours from time of burn) for 20 minutes with cool running water. If unavailable, other options include: frequently changed cold water compresses, immersion in a basin, irrigation via an open giving set. Never apply ice and avoid use of hydrogel burn products.

Clinical Practice Guidelines : Burns - Acute Management
Cool the burn. Hold the burned area under cool (not cold) running water or apply a cool, wet compress until the pain eases. Don't use ice. Putting ice directly on a burn can cause further damage to the tissue. Remove rings or other tight items. Try to do this quickly and gently, before the burned area swells. Don't break blisters.

Burns - Diagnosis and treatment - Mayo Clinic
Management of minor burns Clean burns with soap and water, or a dilute water-based disinfectant to remove loose skin. Blisters smaller than 1cm in diameter (or smaller than the patient's little finger nail) should be left intact to minimise the risk of infection.
