C7's are good engines. However, the fuel pumps can fail and will put metal into the injectors. Cat would suggest full injector replacement and fuel pump, as well as cleaning out the fuel rail inside the head. This most often happened after they were ran out of fuel. It is imperative to be 100% clean when dealing with this fuel system.

I have a 3126E in my 2002 Chevy 7500 dump in front of a 8 sp. RR. Bought new, only issue has been a leaking oil cooler [newer style gaskets are offered now] and a fuel sensor in 55K miles. It is IMPERATIVE that clean oil and the correct oil is always maintained as the oil is the drive for the HEUI system. Plenty of power, I have the 250HP version with a turbo, engine will start at -10\* with the grid ...
