LibGen is a unique concept in the category of eBooks, as this Russia based website is actually a search engine that helps you download books and articles related to science. It allows you to download paywalled content for free including PDF downloads for the stuff on Elsevier's Science Direct website. Even though the site continues to face legal issues due to the pirated access provided to books and articles, the site is still functional through various domains.

Chains Of Finance How Investment

In Chains of Finance, five social scientists discuss the ways in which the intermediaries in the chain influence each other, channel the flows of savers' money, enhance investment decisions, and form audiences for each other's performances of financially competent selves. The central argument of the book is that investment management is fashioned profoundly by the opportunities and constraints this chain creates.

Book Review: Chains of Finance: How Investment Management ...

An investment chain connects all of the actors involved in any investment project. A typical investment chain includes many types of actors, such as companies, banks, suppliers, and development finance institutions. All of the actors in the chain make the project possible. Money flows in both directions through the investment chain.

Transforming Climate Finance and Green Investment with ...

Leveraged Finance is the use of an above-normal amount of debt, as opposed to equity or cash, to finance investment assets. Leverage can enhance returns and leveraged finance is done with the goal of increasing an investment's potential profit, assuming the investment increases in value.

Leveraged Finance - How Leverage is Used to Increase ...

Finance is a term for matters regarding the management, creation, and study of money and investments. Specifically, it deals with the questions of how and why an individual, company or government acquires the money needed – called capital in the company context – and how they spend or invest that money. Finance is then often split per the following major categories: corporate finance ...

Finance - Wikipedia

Finance is defined as the management of money and includes activities such as investing, borrowing, lending, budgeting, saving, and forecasting. There are three main types of finance: (1) personal, (2) corporate, and (3) public/government.
