Climate Change Reality Check - Home | Facebook

Think "not impossible", rather than "possible". "If you would like to stabilise global warming at 1.5C, the key message is that net CO2 emissions at the global scale must reach zero by 2050." Valérie Masson-Delmotte, one of co-chairs of the Intergovernmental Panel on Climate Change's research on the target, said on Monday.

Reality check: is the 1.5C warming target even possible?

The Earth's climate has changed throughout history. Just in the last 650,000 years there have been seven cycles of glacial advance and retreat, with the abrupt end of the last ice age about 11,700 years ago marking the beginning of the modern climate era — and of human civilization.
