### Constellations for Kids: An Easy Guide to Discovering the ...

Toggle text. Since the earliest times, people have looked for patterns in the stars. The people of ancient Greece knew 48 constellations, named after mythical beings. In reality, these patterns bear little resemblance to the beings they are named after. Today, scientists recognize 88 constellations. These modern constellations are not just patterns of stars, but whole segments of sky that fit together like puzzle pieces to form a complete sphere.

The constellation Auriga is mentioned in two ancient stories. The first, relating to a charioteer, is that of Auriga, the crippled son of Vulcan and Minerva, who invented a four -horse chariot in order to get himself around. This became such an important invention that Zeus placed the first chariot into the skies with the other constellations.

### Constellation Legends

Constellation maps divide the celestial sphere into 88 parts, known as constellations, helping astronomers locate stars and deep sky objects. The star constellations that can be seen in the night sky depend on the observer's location and season, and they change throughout the year. Out of the 88 constellations recognized by the International Astronomical Union (IAU), 36 are found predominantly in the northern sky, while the remaining 52 are located in the southern sky.

### Constellation Guide

Summer and winter constellations are different because stars in fact take a little less than an hour to move by 15 degrees, and they complete an entire circle in 23 hours and 56 minutes. In other words, they rise and set four minutes earlier each night. The distance they cross in those remaining 4 minutes is a little less than 1 degree, which means that they move about 361 degrees per day.
