Answer: The diameter will be a perpendicular bisector of the chord, so you need to construct a perpendicular bisector of AB. Open the compass more than half the width of AB. From point A, make small arcs on either side of the line. Do the same from point B without changing the width of the compass. Make points where the arcs intersect.

Apply the Addition Rule, P(A or B) = P(A) + P(B) - P(A and B), and interpret the answer in terms of the model. The Addition Ruleis for finding probabilities such as P(A or B), the probability that either event A occurs orevent B occurs or that they both occur. [] The key word to note here is "or", meaning one or the other, or both.

Algebra 2 Probablilty Notes #2: The Addition Rule Name

Figure shows a metal part hanging by a thin cord from a floating wood block. The wood block has a specific gravity of 0.30 and dimension of 50 x 50 x 10 mm. The metal part has a volume of 6600 cu.mm. Determine: a. The bouyant force acting on the wood block in Newton. b. The tension in the cord in Newton. c. The mass of the metal part in gram.
