What you need to know Foot disease affects nearly 6% of people with diabetes¹ and includes infection, ulceration, or destruction of tissues of the foot.² It can impair patients' quality of life and affect social participation and livelihood.³ Between 0.03% and 1.5% of patients with diabetic foot require an amputation.⁴ Most amputations start with ulcers and can be prevented with good ...

Diabetic foot | The BMJ

Why practice social distancing? COVID-19 spreads mainly among people who are in close contact (within about 6 feet) for a prolonged period. Spread happens when an infected person coughs, sneezes, or talks, and droplets from their mouth or nose are launched into the air and land in the mouths or noses of people nearby.

Social Distancing, Quarantine, and Isolation

6. When modern denominations attempt to practice "foot-washing," that which they do is surely not what the Scriptures describe. "How to Conduct a Foot Washing Service," by Ken Collins, says: "For the people whose feet are being washed: Instruct them to come to the service with clean feet in clean footwear ...

Foot Washing: Should We Wash Feet as Church Worship Ritual?

importance of daily foot care and the association of foot ulcers and amputation of a foot or limb in the diabetic population. Footwashing was a common practice in Jesus's day. Roads were just dirt, and people would have worn sandals of rope and leather. Combine the sweat-inducing heat with nearly bare feet, and dusty roads, and you can imagine the result. When you entered someone's home, you came with filthy, sweaty feet, and it was common courtesy to have a ...
