Developmental Screening test (Denver II - Overview)

Denver Developmental Screening Test: The Denver Developmental Screening Test (DDST) is a widely used assessment for examining children 0-6 years of age as to their developmental progress. The name "Denver" reflects the fact that this screening test was created at the University of Colorado Medical Center in Denver. There are a number of other behavioral assessments for infants and young children.

Definition of Denver Developmental Screening Test

The Denver Developmental Screening Test (DDST) is a test designed for use in initial screening of children to identify those with developmental problems so they can be referred for more precise evaluation and intervention, if appropriate. The test was developed and introduced in Denver, Colorado in the 1960s and is one of the most widely used developmental screening tests.

What is the Denver Developmental Screening Test?

DENVER DEVELOPMENTAL SCREENING TEST. The Denver Developmental Screening Test (DDST) is a screening test for cognitive and behavioral problems in children from birth until the age of 6. It was developed by William K. Frankenburg at the University of Colorado Medical Center, Denver, USA. It was first introduced by him and Josiah.B. Dobbs in 1967.
