Evolutionary Psychology As Maladapted Psychology

Evolutionary psychology is not maladapted, in fact, so the title is just a snide slur. Richardson wears the black gown of "adaptationism," which is a set of doctrines specifying what is and what is not a biological adaptation, and what is and what is not an adequate proof that a human characteristic is an adaptation.

Cognitive psychology is the scientific study of mental processes such as "attention, language use, memory, perception, problem solving, creativity, and thinking".. The origin of cognitive psychology occurred in the 1960s in a break from behaviorism, which had held from the 1920s to 1950s that unobservable mental processes were outside of the realm of empirical science.
