research questions, but

merely explores the

research topic with

varying levels of depth.

Exploratory

Research - Research-

Methodology

Exploratory research is

Mechanics

Get Free

Exploratory

Research Of The

the stage of the

research process that
aims at connecting
ideas as to unveil the

“why”s of potential
cause/effect

relationships. This
occurs when

researchers get started
at understanding what

they are actually
“observing” when in

the process of building
cause/effect models.

The exploratory research design is suitable for studies which are flexible enough to provide an opportunity for considering all the aspects of the problem.

At this point, the required information is loosely defined, and the research process is flexible and unstructured.
