### Family Health Care Nursing Theory

Family Nursing Family nursing is a part of the primary care provided to patients of all ages, ranging from infant to geriatric health. Nurses assess the health of the entire family to identify health problems and risk factors, help develop interventions to address health concerns, and implement the interventions to improve the health of the individual and family.

### Family Health Care Nursing: Theory, Practice, and Research ...

This chapter provides an introduction to and broad overview of family health care nursing, explaining why this information is important to nurses who care for today's families. Family nursing is a scientific discipline based in theory, and Chapter 1 introduces theoretical concepts important to the nurse's understanding of how to care for groups. It also provides definitions of family, family health, family health care nursing, and traits healthy families exhibit.

### Family Health Care Nursing: Theory, Practice, and Research ...

The primary purpose of theory in the profession of nursing is to improve practice by positively influence the health and quality of life of patients. Nursing theories are also developed to define and describe nursing care, guide nursing practice, and provide a basis for clinical decision making.

### Nursing Theories and Theorists: An Ultimate Guide for Nurses

Trust in the patient and the family from health care providers is also critical (Calnan et al., 2006; Giambra, Sabourin, Broome, & Buelow, 2014; Williams, McGregor, King, Nelson, & Glasgow, 2005). Reciprocal trust between patients, family members, and the broad array of providers requires attention (Gilson, 2006). Finally, the dynamic nature of trust must be addressed.

### Trust, Health Care Relationships, and Chronic Illness

The majority of family systems nursing interventions are grounded in the so-called Calgary models, Calgary Family Assessment Model and Calgary Family Intervention Model [15], and in the Illness Belief Model [16]. The aim of these interventions is to support family health by creating a context for change [16].
