Forces Guided And Study Answer - oudeleijoever.nl

force is a force that must touch an object to have an effect on it. Non-contact forces can effect an object from a distance like the force of gravity on Earth. Describe balanced and unbalanced forces. Give examples. B aln c ed fo rs qu forces and unbalance forces are unequal forces. In tug of war, balanced forces mean the rope

Force, Motion, Energy STUDY GUIDE (KEY)

Forces. Describe (what does it say and what is it commonly called) Newton's First law of Motion: Also known as "Law of Inertia". Object in motion stays in motion and an object at rest stays at rest UNLESS acted upon by a NET FORCE. Newton's Second law of Motion: $F = m \times a$. Force equals the product of an object's mass and acceleration.

6. How do balanced and unbalanced forces affect the motion of an object? When balanced forces act on an object, there is no change in the object's motion because the net force is zero. When unbalanced forces act on an object, the net force is not zero, so the object accelerates. Physical Science Guided Reading and Study Workbook Chapter 12 103
