General Guidelines For Preparing Plant Guides | uptoviral.net

During the growing season, the plant should be checked daily and watered to keep the soil mix damp but not soaking wet. Site Preparation: As with a B&B plant, dig a wide hole with sloped sides. Container-grown plants are often shrubs or ground covers so the trunk flare does not exist or is difficult to find.

Planting Guidelines - Container-grown Trees & Shrubs ...

Thorough soil preparation is essential for healthy plant growth. When planting a group of plants, rototill the soil to a depth of 12 to 15 inches. When planting a single tree or shrub, dig the planting hole two to three times wider than the root ball. Place the plant in the hole so the top of the root ball is level with the

...

All soil is a mix of 1. rocks that break down over time mixed with 2. organic matter (dead plants and animals) and other microscopic things that plants need to survive. The rock particles can be either large (sand), medium (silt), or small (clay). These spaces fill with water and air, providing plant roots with oxygen and moisture.

off the excess.

Mailing Garden Plants - Tips On Sending Plants Through Mail

In general, cloth face coverings should be washed regularly (e.g., daily after each shift) using water and a mild detergent and dried completely in a hot dryer. If a washing machine and dryer are not available, an alternative is to soak the cloth face covering in a diluted bleach (0.1%) solution, rinse, and air dry completely.
