### **Governance Of Science Issues In**

Yet, science remains an elite activity that commands much more public trust than understanding, even through science has become increasingly entangled with larger political and economic issues. Fuller proceeds by rejecting liberal and communitarian ideologies of science, in favour of a republican approach centred on the right to the wrong.

### **Governance Of Science (Issues in Society): Fuller ...**

Relying as it does on large-scale state-funded resources, "Big Science" undermines the republican ideal, Fuller argues - failure becomes too costly. Now that the question of government versus private funding for science is regularly being debated in the media, Fuller's proposals detailed in

## **Amazon.com: Customer reviews: Governance Of Science ...**

GOVERNANCE OF SCIENCE. Scientific research is a human activity governed by human choice. Governance is exercised at many levels, from the individual scientist deciding how to design an experiment or interpret and report data, to scientific organizations that advocate research funding, to government bureaucrats allocating resources among various projects or programs, to elected representatives establishing budgetary and programmatic priorities, and citizens lobbying to support (or oppose) a ...

## **Governance of Science | Encyclopedia.com**

The problem of the governance of science has to do with the fact that the science as we normally understand it is an authoritative form of knowledge, and it gains that authority from having been produced by what we regard as the best methods available to produce knowledge.
