WELCOME TO HYDROPOWER ENGINEERING. Hydropower Engineering provides mechanical and electrical engineering and project management services to the hydropower industry. Our consulting services cover key aspects of hydropower generation, including investigation of operational and maintenance problems, plant performance assessments, site supervision, dam safety reviews, and assistance with refurbishment and hydro development projects.

Hydropower Engineering

Power plant engineering or power station engineering is a division of power engineering, and is defined as "the engineering and technology required for the production of central station electric power." The field is focused on the generation of power for industries and communities, not for household power production. The field is an interdisciplinary field, using the theoretical base of both ...
