Honda GX390 K1 (389 cc, 13.0 HP) engine: review and specs

Bought this for my GX390 13 hp Honda engine (pressure washer). After easy install started right up. Adjusted fuel/air mix. Reset idle. Now starts and runs like when new. Usually one pull does it. Highly recommend and would buy again. Would recommend checking spark and compression (90-100psi) to eliminate any other hard start/run issue.

Honda Engines GX390 Parts Lookup by Model

The GX160 carb has only one adjustment, idle mixture screw. High speed is fixed. Pull the carb and give it a good clean up. Remove the carb bowl and with a proper fitting screwdriver remove the main jet from the carb barrel. If the fuel nozzle doesn't fall out, it can usually be pushed out from the top from the venturi of the carb.

Honda Engine Help | LawnSite.com™ - Lawn Care ...

Discussion Starter • #13 ... a friend of mine told me that the best way to adjust the air/fuel screw is to set the idle speed screw to your desired idle RPM, then adjust the air/fuel screw till the idle raises and you get it to the fastest idle possible. When the idle is at the fastest RPM, bring down your idle speed screw back to your ...

Honda GX340 how do I adjust the idle, will run if I jump on the gas extremely low idle mostly dying. - Answered by a verified Technician. We use cookies to give you the best possible experience on our website.

Honda GX340 how do I adjust the idle, will run if I jump ...

But I got close and figured out that the engine is a Honda GX390 and found replacement carburetors for that. It looked like Amazon had a carb that was almost perfect. The new carb had a fuel shut off valve that was not present on my old carb, and it did have an idle adjustment - which I liked. For \$15 I ordered one to see if I could make it ...
