### Amazon.com: imac replacement hard drive

Without knowing the specs, all iMac G4s can run at least 10.4 Tiger, so go with that. Trying to install Linux is really messy with those. So, save the hard drive, just get a Copy of OS X somewhere. Make sure it's the PowerPC version, though. Oh, and the blue screen with buttons is the startup chooser. This allows you to manually choose the startup disk.
