#### **Informed Consent In Medical Research**

Informed consent is an essential safeguard in research. The obligation to obtain informed consent arises out of respect for persons and a desire to respect the autonomy of the individual deciding whether to volunteer to participate in biomedical or health research. For these reasons, no person may be used as a subject in research against his or her will.

#### **Informed Consent in Research | American Medical Association**

Editor—The editorial by Richard Smith raised the issue of publishing studies in which the researchers did not seek patients' consent. 1 Firstly, I would think that of all the professions, only in medicine would there be any sort of debate about whether people need to be told that they, their bodies, their body fluids, their emotions, or whatever were to be subjects of research.

#### **Informed consent in medical research | The BMJ**

Informed consent means that the purpose of the research is explained to them, including what their role would be and how the trial will work. A central part of the informed consent process is the...
