Woodworking Jigs Fixtures | St. Charles Hardwoods

The fixtures are heavier in construction and are bolted rigidly on the machine table, whereas the jigs are made lighter for quicker handling and clamping with the table is often unnecessary. The fixtures are employed for holding work in milling, grinding, planing or turning operations, whereas the jigs are used for holding the work and guiding the tool, particularly in drilling reaming or tapping operations.

Jigs and Fixtures: Types, Parts, Working, Applications ...

Set the rip width. Adjust the jig to the desired rip width and tighten the knob. Then slide the jig to the front of the table saw and clamp in place. Set the saw's fence. Use the board you're going to rip to set the fence. Hold the board against the fence and slide it until it makes contact with the jig.

4 Handy Table Saw Jigs | Popular Woodworking Magazine

This jig is designed to utilize the table saw fence to help locate these splines and make for repeatable cuts. As described in the video, this jig starts with the base that is designed to fit the intended table saw fence being used. It's important that this base doesn't fit too tightly on the fence or it won't slide easily.
