The Environmental Science 110 laboratory focuses on environmental issues such as climate variation, atmospheric pollution and non-point-source water pollution. The course is made up of 10 laboratory exercises, with two field labs. In this course students learn to investigate the natural world through the process of the "scientific method."

Environmental Science 110 Laboratory - Courses

Lab Bundles. Environmental science may be the most difficult science course to teach because it requires a solid background in biology, ecology, chemistry and physics. It is really hard to be good at all these subjects, therefore we have created some lab "bundles" for instructors who wish to put an emphasis on biology, chemistry or physical science. Further information regarding individual labs can be found here.
