### Little Blue Whales by Kenneth R. Lewis

Blue whales look true blue underwater, but on the surface their coloring is more a mottled blue-gray. Their underbellies take on a yellowish hue from the millions of microorganisms that take up...

### Blue whale, facts and photos - National Geographic

Famous for their sheer mass, blue whales glide effortlessly through the ocean, dwarfing all else in their path. Commanding awe, they grow to over 33 meters long (around 100ft) – twice as long as a T-Rex dinosaur. Even their calves are a whopping 7 meters in length, weighing in the same as an adult African elephant.

### Blue whale - Whale & Dolphin Conservation USA

The blue whale has a wide head, a small dorsal fin located near the fluke, and 80-100 long grooves running lengthwise down the throat and chest. Its mouth contains up to 800 plates of short, wide, black baleen, or "whalebone," with thick, coarse bristles used for catching food.

### blue whale | Facts, Habitat, & Pictures | Britannica

For Antarctic blue whales, a single calf is born at 23 ft (7 m) in length and weighs 2.8-3 tons (2540-2722 kg). [15][105]There is a 6-8 month weaningperiod until the calf is 53 ft (16 m) in length.

### Little Whale Swim School - Premier Swim School of Greater ...

A small blue whale sits in a silver sea . . . wishing, wanting, waiting for a friend. Waiting is hard, but he doesn't mind; he's sure a friend will be worth the wait. First, the whale meets a quiet pink cloud, and he thinks this might be the friend he's been waiting for. But when he finds himself in trouble, a group of penguins comes to his rescue and the small blue whale finally gets his wish.

### Little blue whale | Etsy

Scientists know little about the life history of the blue whale. The best available science suggests the gestation period is approximately 10 to 12 months, and that blue whale calves are nursed for about 6 to 7 months. Weaning probably occurs on, or en route to, summer feeding areas. The age of sexual maturity is thought to be 5 to 15 years.
