Mathematics of Interest Rates and Finance: Guthrie, Gary C ...

Interest rates are always in a state of flux, so rates in problems and examples that seem a little high for today's market may be too low in a year or two. In the summer of 2003 the prime rate had dropped to 4.00%, an impossibly low figure from the perspective of the mid-1990s, when it hovered around 8% to 9%.

Mathematics of Interest Rates and Finance: Pearson New ...

Mathematics of Interest Rates and Finance: Guthrie, Gary C ... When the amount of interest, the principal, and the time period are known, you can use the derived formula from the simple interest formula to determine the rate, as follows: $I = Prt$ becomes $r = I/Pt$ Remember to use 14/12 for time and move the 12 to the numerator in the formula above.
