Manuals are revised as new procedures are developed, or modifications made to existing models. We have over 40,000 technical manuals covering aircraft, engines, and other air-related equipment. Most of these manuals were developed and published by the military for their own use from circa 1915 through 1970, with the bulk of the manuals covering World War II aircraft (1940-1945).

An aircraft flight manual (AFM) is a book containing the information required to safely operate the aircraft. Each AFM is tailored for a specific aircraft, though aircraft of the same make and model will naturally have very similar AFMs. The information within an AFM is also referred to a Technical Airworthiness Data (TAWD).
