Go to your a records for the hotmodz.net domain. for alias www select @ from the drop down. @ signifies for subdomain www redirect to domain.com. Do this for ftp as well if your using ftp. You can also put in a * wildcard and direct it to @ so any subdomain of your main domain will redirect to the main domain.

Network Solutions Forwarding - DNS - Spiceworks

No, you cannot redirect HTTP to HTTPS at the DNS level. This is something you have to configure on your web server (because it manages the protocol). If you don't have access to your web server, you will need to contact your web hosting provider. What We Will Cover:

HTTP Redirects with DNS, and Why HTTPS Redirects are So ...

Network Solutions offers the following code as the best redirect available from http:// to https:// in Javascript, saying that there is no way to do it server side. <script language="javascript"> if (document.location.protocol != "https:") {document.location.href = "https://subdomain.yourdomain.com" + document.location.pathname;}; </script>

SOLVED: Network Solutions and Force HTTPS problems ...

If you would like to redirect traffic for a second-level domain, you can review our Web Forwarding product. In the Host Aliases (CNAME Records) section, click the Edit CNAME Records button. Type the new Aliases or update the existing Aliases in the Alias text boxes.

How Do I Manage Advanced DNS Records? · Web.com Support

A 301 redirect is the best search engine and user-friendly method for webpage redirection. Redirects take a visitor from one URL to the next URL. Although redirects may serve many purposes, the main SEO purpose is to serve one copy of each page to the search engines. The 301 code is interpreted as moved permanently. Having multiple URLs that all go to the same website may be viewed by Google® and other search engines as different websites, which could create duplicate content penalties.
