By Bill Dyszel. After you sign up with an ISP (Internet Service Provider), you can set up Outlook 2007 to send and receive e-mail from your e-mail account at home. Although any individual Internet e-mail account requires setup only once, you can set up as many accounts as you need. If you're a corporate user, your system administrators may not want you to mess around with account settings at all — or may have special arrangements and settings they want you to use when you work from home.
