Book Review - Orchid Growing for Wimps - Orchids

Your growing space may require watering more or less often. Orchids generally want a wet-dry cycle of some sort (to mimic the rain). For plants like Phalaenopsis, you should water when the mix has become dry (not BONE dry, but “unmoist”). Stick your finger into the mix to see if it is still moist near the center.

To grow orchids, choose a snug pot and use a porous potting medium like bark chips, sphagnum moss, or perlite. Put your orchids in a location that gets plenty of indirect light every day, such as a south or east facing window. Maintain a humidity level of 50-75% by running a humidifier or placing a tray filled with pebbles and water near the orchids.

Remove the orchid from the old bark (which you can toss on your compost pile!), and clip off the dead roots. You should be able to spot any dead roots right away—they'll be dark and shriveled, compared to the firm, light-colored healthy roots. Place the orchid back in the pot (or repot it) and refill with new bark.
