... Operative Pain

Peripheral nerve blocks (PNBs) are a safe alternative to opioids for acute pain management and help anesthesiologists to provide safe and effective patient care. PNBs for the treatment of chronic pain post-herniorrhaphy can help avoid more aggressive treatments (e.g., surgery).

Periarticular Injection
As mentioned above, ACBs have become more popular due to equivalent pain control and decreased motor blockade when compared with FNBs.

[1] Periarticular injections are also being used more frequently as part of a multimodal pain control strategy. [1]
