How to Work With Natural Light Headshot Photography You rarely need a studio for great headshots these days. Unless you're dealing with corporate clients, formal professions, or very specific requests so a lighting setup is not always a requirement.

### How to Take Headshots | Professional Headshot Photography Tips

As we all know, there is no ONE camera lens for any specific type of photography session. You can use a prime lens or a zoom lens, but prime lenses tend to be the more popular choice. Most headshot photography experts recommend a fixed 35mm, 50mm Or 85mm lens, or a 24-70mm zoom lens.

### Mastering Headshot Photography: 17 Tips for Success

Follow these few tips to achieve the perfect headshot. 1. Focus on the eyes. The eyes are said to be the window of the soul. Therefore, nothing is more important than achieving sharp, crisp eyes in your shot. Capturing the eyes in a powerful way will draw the viewer into the photo, establishing a strong connection that will speak volumes. 2.

### How to Take Perfect Headshots: Six Tips

Butterfly lighting is aptly named for the butterfly shaped shadow that is created under the nose by placing the main light source above and directly behind the camera. The photographer is basically shooting underneath the light source for this pattern. It is most often used for glamour style shots and to create shadows under the cheeks and chin.
