1. Ratios and percentages • A ratio is the relative magnitude of two like quantities. Thus: $1:10 = 1$ part in 10 parts, which might be 1 g in 10 g or 1 mL in 10 mL. Therefore, if 1 g of sucrose is in 10 g of solution, the ratio is 1:10. Equally, if we have 10 g of sucrose in 100 g of solution the ratio remains 1:10.
