About Eclipse UML Generators. Eclipse UML Generators provides components that automatically bridge the gap between UML models and source code. Either by extracting data from UML models (and UML profiles or decoration models) to produce source code or by reverse-engineering source code to produce UML models. Code generation uses Accileo which is a pragmatic implementation of the Object Management Group (OMG) MOF Model to Text Language (MTL) standard.

Eclipse UML Generators | The Eclipse Foundation

I am currently working on a Java project with "IBM Rational Software Architect"(Licensed Version) as an IDE. My task is to understand the code flow and need to prepare Technical Document as the project is very big (a lot of codes, classes, packages, etc) and undocumented. Since, the project is written in Java, my idea was to reverse engineer this project to see its architecture in UML.

eclipse - UML tool for reverse engineering a Java Project ...

Hello users of the forum, I'm a newbie forumers and I have a question. I read other topic about some eclipse plugin, like omond, that permitted reverse engineering, like create UML class or sequence diagram from existing java class.

Eclipse Community Forums: UML2 Tools » Reverse engineering ...

I am looking out for a eclipse plugin or an open source tool to reverse engineer the sequence diagrams. I tried using Alto UML, but it just gives out sequence diagram of the class chose. I would like to have a sequence diagram of the whole call stack with methods, input arguments and output arguments as well.

Eclipse plugin or a Open source tool to reverse engineer ...

The ObjectAid UML Explorer is an agile and lightweight code visualization tool for the Eclipse IDE. It uses the UML notation to show a graphical representation of existing Java code that is as accurate and up-to-date as your text editor, while being very easy to use.

ObjectAid UML Explorer

Eclipse plugin to reverse engineer Apex to UML? I've inherited a large Apex project, 10s of KLOC. I don't think any UML diagrams for this exist. For my own clear understanding of what's happening in this code I am looking for an Eclipse plugin (preferably FREE) that supports generating UML from my Apex code. Any suggestions?

Eclipse plugin to reverse engineer Apex to UML ...

Jupe is a UML Plugin for Eclipse for creating UML class diagrams, generating Java code, and reverse engineering UML class diagrams. The plugin is based on the GEF and UML2 frameworks and supports Eclipse 3.2. Jupe is published as open source software distributed under the GNU General Public License (GPL).

Jupe is a UML Plugin for Eclipse

I'm using the Papyrus Reverse Engineering Java plugin and am able to create UML diagrams from my Java packages, but when I drag and drop the package into the Papyrus model, it only creates the class diagrams. It does not create any of the lines to show associations between the classes. For example, I have a Java package with the following classes:

Eclipse Community Forums: Papyrus » Reverse Engineer Java ...

MaintainJ, an Eclipse plug-in, generates UML sequence and class diagrams for a given use case, helping users to quickly understand a complex Java/JEE application. MaintainJ logs runtime method execution trace and uses that to render sequence and class diagrams
