s9 vpap tm s The S9 VPAP S is designed to deliver effective and comfortable bilevel therapy to a wide range of patients, including those who are unable to tolerate standard CPAP therapy. Incorporating the stylish design and sophisticated comfort features of the award-winning S9™ platform, VPAP bilevel devices help you comfortably transition to therapy so you can experience the benefits of restful sleep.

### **S9 VPAP S | ResMed**

The ResMed CPAP S6 is an older CPAP model that is still sold by some retailers. Unlike more recent CPAP machine designs, adjusting the prescribed air pressure on the S6 is not simply a matter of programming in a new pressure setting. Connect the air tubing to the CPAP machine, but do not connect the mask.

The ResMed S8 CPAP line of machines were made starting in 2005 and continuing through 2009. The early models had issues with smoking and a crackling sound from where the power cord plugged into the cpap. This was caused from constant pulling on and off the plug which will break loose the internal connections. If you experience this issue with your S8 CPAP, immediately stop using it as it may ...
