Lead task forces to solve problems involving a wide range of cross-functional issues: Photonics active devices and passives, fab process, packaging, High-speed electrical, thermal, mechanical ...

Rockley Photonics Inc. hiring Principal Photonics System ...

Testing (especially at the wafer level) and packaging economics both demand extraordinary speed and parallelism. SiP is a mission-critical, industry-wide initiative across the semiconductor field, and also the animating energy behind photonics' resurgence. PI's FMPA is the fastest, most flexible, most robust solution.

Active Photonics Alignment | Optics Alignment | Solutions

Evolution photonics aims to bridge the gap between ideas, technologies, and users by helping manufacturers developing products based on IR laser technologies and by helping users understand the details of their application and select the right solution for their problems.
