This is sometimes called a “two-box” arrangement—the auditorium and stage occupy two separate “boxes” or rooms. The stage box (stage house) provides fly space and wings and permits a wide variety of scenic and lighting effects. The auditorium box is the audience chamber, which may take many forms—fan-shaped, courtyard, lyric, etc.

with DOAS HVAC system (one DOAS per floor). The fan coil with DOAS system (centralized DOAS, with zone level conditioning) is applied to all space types except Cafeteria, Kitchen, Gym, and Auditorium; packaged single zone equipment is applied to those zones.

## **AedgK12HvacFanCoilDoas | Building Component Library**

3.4.1.2 A building or a building complex is usually a group of spaces or rooms intended for various functions. Those spaces may require involvement of different types of acoustics as stated in Table 8.4.1. For example, a school has spaces for speech (e.g., classroom), music (e.g., music room) and multipurpose (e.g., auditorium).
