The CogScreen-Aeromedical Edition (CogScreen-AE) is a computer-administered and scored test designed to evaluate neurocognitive or psychological deficits that may affect flight performance or flight training. The primary mission of the Federal Aviation Administration (FAA) is to ensure safety of civil aviation, therefore, the CogScreen-AE is utilized to identify subtle changes in cognitive functioning of current and prospective pilots.

CogScreen Testing for Pilots | Bayview Therapy

CogScreen-AE (a brief test battery developed specifically for use with pilots to assess the neurocognitive domains most critical to flight performance). If the neuropsychologist interprets the clinical interview and CogScreen-AE results to show no evidence of neuropsychological impairment or deficiencies, then no further neurocognitive testing needs to be conducted at that time as part of the evaluation.

Guide for Aviation Medical Examiners

One version of the battery, CogScreen®-Aeromedical Edition, is used worldwide in the medical re-certification evaluation of pilots with known or suspected neurological and/or psychiatric conditions. For example, the test is used by the FAA to monitor the neurocognitive functioning of HIV seropositive pilots.

CogScreen

The letter authorizing special issuance will outline required testing, which may be limited to specific tests or expanded to include a comprehensive test battery. Useful references for the neuropsychologist: MOST COMPREHENSIVE SINGLE REFERENCE: Aeromedical Psychology (2013). C.H. Kennedy & G.G. Kay (Editors). Ashgate.

Guide for Aviation Medical Examiners

CogScreen-Aeromedical Edition (CogScreen-AE) is a computer-administered and scored cognitive-screening instrument designed to rapidly assess deficits or changes in attention, immediate- and short-term memory, visual perceptual functions, sequencing functions, logical problem solving, calculation skills, reaction time, simultaneous information processing abilities, and executive functions.

CogScreen-Aeromedical Edition - De la Rosa Research - Details

The testing often includes a combination of neuropsychological assessment, CogScreen Aeromedical Edition (AE) assessment, and/or psychological assessment. The FAA has developed several testing protocols specifying what tests are required at a minimum.
