The Black Cloud Fred Hoyle

The Black Cloud is a science fiction novel by British astrophysicist Fred Hoyle. Published in 1957, the book details the arrival of an enormous cloud of gas that enters the solar system and appears about to destroy most of the life on Earth by blocking the Sun's radiation.

The Black Cloud - Wikipedia

A landmark of British science fiction, The Black Cloud (1957) was the first novel by world-renowned astronomer Sir Fred Hoyle (1915-2001), who used his own scientific background to create a frighteningly real apocalyptic thriller in which, Hoyle said, "there is very little that could not conceivably happen." Long recognized as a classic in Great Britain, Hoyle's novel returns to print in the U.S. for the first time in over 40 years in this edition, published to coincide with the centennial ...

The story is good too, and even quite possible; our solar system could very well traven through a cloud in its wanderings around the galaxy. See also Conan Doyle's Professor Challenger story "The Poison Belt" which I'm convinced inspired Fred Hoyle to write his story. "Black cloud" is not dated at all in my opinion, but then you might disagree.

The Black Cloud by Fred Hoyle - review | Books | The Guardian

Sir Fred Hoyle FRS was an English astronomer who formulated the theory of stellar nucleosynthesis. He also held controversial stances on other scientific matters—in particular his rejection of the "Big Bang" theory, a term coined by him on BBC radio, and his promotion of panspermia as the origin of life on Earth. He also wrote science fiction novels, short stories and radio plays, and co-authored twelve books with his son, Geoffrey Hoyle. He spent most of his working life at the Institute ...

The Black Cloud (1957) - Valancourt Books

Hoyle's The Black Cloud is very good science fiction, not boring at all, as some have said, but engaging, interesting and quite plausible. Add to this an interesting introduction by Richard Dawkins and an excellent narration by Jack Klaff and you get an audiobook which is quite close to perfection. 3 people found this helpful

The Black Cloud by Fred Hoyle. Earth was dying. One fourth of its population was dead. The rest had little time to live. A mass of interstellar matter had invaded the solar system, fling planets out of orbit and blocking off the sun. In that titanic disaster, Man had one small chance to survive: Appeal to an alien intelligence that might exist, and that might--or might not--care enough to help!
