A J-curve is a trendline that shows an initial loss immediately followed by a sharp gain. In a chart, this pattern of activity would have the shape of a capital "J".

What Is a J-Curve?

In economics, the 'J curve' is the time path of a country's trade balance following a devaluation or depreciation of its currency, under a certain set of assumptions. A devalued currency means imports are more expensive, and on the assumption that the volumes of imports and exports change little at first, this causes a fall in the current account (a bigger deficit or smaller surplus).

J curve - Wikipedia

The J-Curve maps the ups and downs of daily life onto the story of Jesus. It grounds our journeys not in some abstract idea but in union with Christ and his work of love. Understanding our lives in light of the J-Curve roots our hope, centers our love, and tethers our faith to Christ.
