Generally in econometrics, linear equations are used to measure the relationship between the dependent and independent variables. Step 6 of 14 In linear regression analysis, the relationship between the dependent and independent variable is constant. Meaning, when there is a one-unit change in x ; the value of y will change by one unit.

Using Econometrics A Practical Guide, Sixth Edition.pdf ...

We can use econometrics to quantify economic activity because econometrics allows us to estimate numbers and put them in equations that previously contained only abstract symbols. For example, consumer demand for a particular commodity often can be thought of as a relationship between the quantity demanded (Q) and the commodity's price (P), the price of a substitute good (P_s), and disposable income (Y_d).
