What Engine Oil Do I

Oil companies' use of additives is another approach to improving and maintaining oil performance. High engine temperatures combine with moisture, combustion byproducts (such as unburned gasoline ...

Motor Oil for Cars - How To Pick The Right Engine Oil

Engine oil is needed to lubricate the exhaust valves; it is subject to extremely high temperatures in this area. High-pressure gasses produced here may damage the oil or cause it to evaporate. Engine oil also lubricates the very thin space (about 1-thousandth of an inch) between the bearings and the moving surfaces of the crankshaft.

Engine Oil: What Does It Do, And Why Is It So Important?

To do that, secure the oil filler cap and run the engine for about 30 seconds. After letting the oil settle for a minute or two, pull the dipstick and wipe it clean. Insert it fully and pull it again, this time checking to confirm the level is at the "full" mark on the dipstick.

Find Out The Proper Oil Level And Needs For Your Car's Engine

The '30' or '40' refers to the oil flow at higher engine temperatures. '30' is often for newer petrol engines, while '40' is often for older or diesel engines. 5W-30 and 5W-40 oils are compatible with some models of common cars, like the Ford Focus, Ford Ka, Honda Civic and VW Golf.

Which oil does my car need? Find the right viscosity | The AA
