## **4JH3E - Diesel Engine - Keypart**

At higher RPMs, it gets up to the middle of the guage - around .4 MPa. The low-oil-pressure alarm does turn off immediately after starting the engine, even at idle while the oil-pressure gauge reads zero. I've had the local Yanmar service mechanic inspect the engine, and I don't recall him registering any concern about the oil pressure.

## **Yanmar 4JH series oil related questions**

I have the "proper" Yanmar workshop manual and it talks about 'standard' pressure (measured at the oil sender outlet) being 42 to 56 psi whatever the discharge volume i.e however fast the engine is reving. It also says 'secondary' oil pressure (whatever this means!) should be measured and is 7psi at idle and 42 to 56psi at 3600 revs).

## **Yanmar Oil Pressure Wrong Way Round! | YBW Forum**

I installed the oil pressure sensor and EM2000 NMEA interface last year and all is working fine, but I can't find a reference oil pressure for the 4JH5E that would give me something to compare what i'm getting to. At idle i get around 2.8 bar and as I push the RPM up it seems to settle around 3.5 bar.

yorkrose wrote: The 4JH service manual that is widely available on the internet says the oil capacity is 3.0 liters "effective" and 6.5 liters "max". I believe that means a full refill would take 6.5 liters, and if there is only 3.5 liters in the sump the pump will run dry, or would otherwise not work right.
