I tried those algorithm books Algorithm Design by Kleiberg Algorithms (4th Edition) by Sedgewick My favorite is Neapolitan's, because 1. It covers both design paradigms and complexity analysis. Kleinberg's focus on design paradigm, and Sedgewick's focus on complexity analysis of already existing algorithms. Neapolitan is somewhere between those two. 2.

solution is inadequate. To provide a better perspective on how algorithm problems arise in the real world, we include a collection of “war stories,” or tales from our experience with real problems. The moral of these stories is that algorithm design and analysis is not just theory, but an important tool to be pulled out and used as needed.
