Atlas of Fish Histology - PDF Free Download

Histology is the discipline of biology that involves the microscopic examination of thin stained tissue sections in order to study their structure and correlate it with function. Histology can detect signs of disease not easily recognized on gross examination and can therefore be of interest in fish health supervision. The aim of this volume is to present a general reference guide providing an ...

Atlas Of Fish Histology - Bit of News

Since the structural and functional basis of an organism is the cell, histology is probably the most important single study in pathology. It seems that, hitherto, no information on histology of fish had been published and this is an attempt to fill the gap. The authors have produced an excellent book.
